Status	Finished
Started	Monday, 2 November 2026, 10:56 PM
Completed	Monday, 2 November 2026, 11:02 PM
Duration	6 mins 9 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Complete

Mark 0.00 out of 1.00

Very slow way of sorting is_____

a. Quick sort

b. Heap sort

c. Insertion sort

d. Bubble sort

The correct answer is:
Insertion sort

Question **2**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm would be preferred for its divide-and-conquer approach?

a. Binary Search

b. Linear Search

c. Merge Sort

d. Bubble Sort

The correct answer is: Merge Sort

Question **3**

Complete

Mark 1.00 out of 1.00

What is mean by stable sorting algorithm?

a. A sorting algorithm is stable if it preserves the order of all keys

b. A sorting algorithm is stable if it doesn't preserver the order of duplicate keys

c. A sorting algorithm is stable if it preserves the order of non-duplicate keys

d. A sorting algorithm is stable if it preserves the order of duplicate keys

The correct answer is:
A sorting algorithm is stable if it preserves the order of duplicate keys

Question **4**

Complete

Mark 1.00 out of 1.00

Which built-in Python function is used to sort data?

a. arrange()

b. order()

c. sort()

d. sorted()

The correct answer is: sorted()

Question **5**

Complete

Mark 1.00 out of 1.00

What is one of the key advantages of using the built-in sorted() function in Python?

a. It is less efficient than custom sorting algorithms

b. It sorts data out of the box efficiently

c. It only works with integer arrays

d. It requires external libraries

The correct answer is: It sorts data out of the box efficiently

Question **6**

Complete

Mark 1.00 out of 1.00

Two-way merge sort algorithm is used to sort the following elements in ascending order.
200,470,150,80,90,40,400,300,120,70
What is the order of these elements after second pass of the merge sort algorithm?

- a. 80,150,200,470,40,90,300,400,70,120
- b. 200,470,80,150,40,90,300,400,70,120
- c. 40,70,80,90,120,150,200,300,400,470
- d. 40,80,90,150,200,300,400,470,70,120

The correct answer is:
80,150,200,470,40,90,300,400,70,120

Question **7**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm involves comparing elements and swapping adjacent items that are out of order?

- a. Linear Search
- b. Merge Sort
- c. Bubble Sort
- d. Binary Search

The correct answer is: Bubble Sort

Question **8**

Complete

Mark 1.00 out of 1.00

What is one advantage of sorting a list before performing a search operation?

- a. It increases the number of comparisons needed
- b. It has no effect on the search operation
- c. It allows for faster searching
- d. It makes the search operation slower

The correct answer is: It allows for faster searching

Question **9**

Complete

Mark 1.00 out of 1.00

What is the primary advantage of the divide-and-conquer approach in sorting algorithms?

a. It simplifies the sorting process by using only one pass
b. It allows for efficient parallel processing and sorting of data
c. It only works on small datasets
d. It avoids the need for recursion

The correct answer is: It allows for efficient parallel processing and sorting of data

Question **10**

Complete

Mark 1.00 out of 1.00

What does the Bubble Sort algorithm primarily focus on during each pass?

a. Dividing the list into halves
b. Sorting the entire list in one pass
c. Bubbling up the largest element to its correct position
d. Bubbling up the smallest element

The correct answer is: Bubbling up the largest element to its correct position

Question **11**

Complete

Mark 1.00 out of 1.00

What is a significant characteristic of Bubble Sort?

a. It divides the list into sublists
b. It uses the heap data structure
c. It bubbles up the largest element in each pass
d. It recursively sorts subproblems

The correct answer is: It bubbles up the largest element in each pass

Question **12**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm is based on repeatedly dividing the list into halves?

a. Quick Sort
b. Merge Sort
c. Bubble Sort
d. Insertion Sort

The correct answer is: Merge Sort

Question **13**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm is described as making multiple passes through a list, comparing elements, and swapping adjacent items that are out of order?

a. Merge Sort
b. Bubble Sort
c. Quick Sort
d. Insertion Sort

The correct answer is: Bubble Sort

Question **14**

Complete

Mark 1.00 out of 1.00

Which of the following best describes the term "sorting" in computer science?

a. Removing duplicates from a list
b. Finding a specific element in a list
c. Arranging data in a specific order
d. Merging two datasets

The correct answer is: Arranging data in a specific order

Question **15**

Complete

Mark 1.00 out of 1.00

Which of the following best describes the process of Merge Sort?

a. It builds a sorted array one element at a time
b. It repeatedly finds the minimum element and moves it to the sorted part of the list
c. It compares adjacent elements and swaps them if necessary
d. It divides the list into two halves, sorts each half, and then merges them

The correct answer is: It divides the list into two halves, sorts each half, and then merges them
